

# Nu-Tek Lactalbumin Hydrolysate

Product Code: 5100

## For Use in Culture Media and Fermentation Nutrient Systems

Lactalbumin Hydrolysate is produced by enzymatically hydrolyzing whey and lactalbumin protein. This highly hydrolyzed protein produces a peptone rich in amino acids and peptides with molecular weights less than 5,000 Daltons. This peptone can be used in cell and tissue culture media, microbiological media, and as a nutrient in fermentation media
